Tunis, Tunisia

OBJECTIVE

Computer Science graduate from the Faculty of Sciences of Tunis seeking opportunities to apply and expand my knowledge in software engineering and information technology. I am motivated to contribute to projects, and continuously develop my technical and professional skills.

EXPERIENCE

Nexits

May 2025 – June 2026

Summer Internship → End-of-Studies Internship

Tunis, Tunisia

- Progressed from a summer intern to an end-of-studies intern, contributing to the development of backend services with NestJS, TypeScript, and PostgreSQL.
- Developed the backend of MedLink, designing RESTful APIs and integrating them with a Flutter mobile application.
- Implemented automated testing, CI/CD pipelines with GitHub Actions, and deployed applications on AWS using Nginx.
- Collaborated with the development team to deliver scalable and secure backend solutions.

Amen-Bank

July 2024 - August 2024

Summer Internship

Tunis, Tunisia

- Developed a banking web application supporting user management, balance consultation, and money transfers.
- Implemented two-factor authentication (OTP) and secure user authentication to protect sensitive operations.

PROJECTS

AI Project: AI-Powered Email Assistant

June 2026

Tools: NestJS, React.js, PostgreSQL, Drizzle ORM, Ollama

- Developed an AI-powered email assistant that generates context-aware drafts using local large language models.
- Built a benchmarking framework to compare Qwen2.5, Llama 3.1, and Mistral across realistic email-generation scenarios.

Cybersecurity Project: Development of a Capture The Flag (CTF) Platform

January 2026

Tools: Node.js, React, Docker, MongoDB, AWS

- Developed a web platform for hosting and solving cybersecurity challenges in isolated environments.
- Automated deployment and orchestration of Docker-based challenge instances on cloud infrastructure.

Backend Project: Package Management Application Development

March 2025

Tools: Spring Boot, MySQL

- Developed a package delivery platform where clients manage shipments and couriers submit delivery offers.
- Designed a scalable REST API using Spring Boot with role-based access control and secure data management.

Web Project: Real-Time Chat Application Development

July 2024

Tools: MongoDB, React.js, Node.js, Socket.io

- Built a real-time messaging application with instant communication, online presence, and global state management.
- Designed a responsive user interface using TailwindCSS and DaisyUI.

Linux Project: Linux Environment Management and Customization

Present

Tools: Linux, GNU Stow

- Built a portable Linux development environment by managing dotfiles with GNU Stow.
- Automated workstation setup through configuration scripts and reproducible system customization.

SKILLS

Programming Languages: C, C++, Java, Python, Shell, JavaScript, TypeScript
Web and Mobile Technologies: Spring Boot, React, Tailwind, NestJS
Backend Technologies: Node.js, Express.js, Spring Boot, NestJS
Database Management Systems:: PostgreSQL, MySQL, MongoDB
Testing Technologies: JUnit, Postman, Swagger
DevOps & Version Control Tools: Git, Docker, Linux
Other Tools & Technologies: GitHub

LEADERSHIP EXPERIENCE

Material Resource Manager
Free Software Club CLLFST

2024-2026
[🌐]

- Co-founded the Genesis programming competition and contributed to technical event organization.
- Delivered Windows and Linux technical support, troubleshooting software and hardware issues.

CERTIFICATIONS

Nvidia: Fundamentals of Deep Learning
AWS Academy Graduate: AWS Academy Cloud Foundations
CCNA: Introduction to Networks
Introduction to Cybersecurity
Introduction to the Threat Landscape 2.0
Networking Academy: Learn-A-Thon 2025

November 2025
January 2026
October 2024
August 2024
May 2024
February 2024

EDUCATION

Faculty of Sciences of Tunis
• Bachelor’s Degree in Computer Science
Sadiki High School
Secondary Education
• Mathematics Baccalaureate (Fairly Good Mention)

2024 - 2026
Tunis, Tunisia
2019 - 2023
Tunis, Tunisia

ADDITIONAL INFORMATION

Language Skills: Arabic (native), French (professional), English (professional), German (intermediate)
Interests: Emerging technologies (AI, Cloud, backend engineering), Open-source projects
